ultraWAVE Art Metal Studio is a unique metalsmithing workshop, located in Yorktown NY. The studio is open daily to the design trades, by appointment, for consultations and work viewings.

The Studio specializes in precision vitreous enamel techniques, including champleve (a method of kiln fired glass inlay) and basse-taille (a method of kiln fired glass overlay). Alternative color palettes are available, as are alternative metal reserve finishes. Sample dimensions of the works presented are indicated on our website. Each work is hand crafted, bears the Studio hallmark and presents subtle (and pleasant) size and color variations.

Works are available with an approximate 4 week production time. Trade discounts are quoted upon the Studio's validation of RFQ's. Please submit RFQ's with business detail, by email or through our website.
