

# The ideal solution for fadeproof, cleanable comfort, indoors & out.

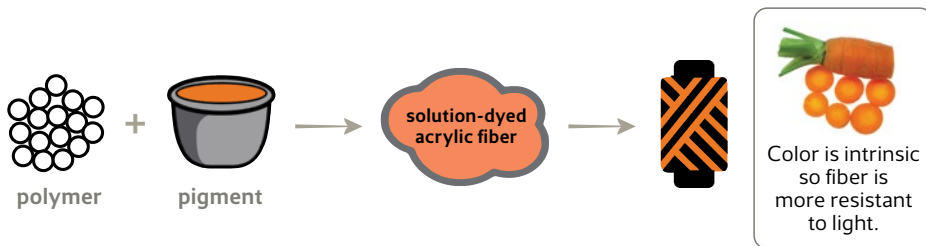

What you need to know about solution-dyed acrylic fabrics.

## What is solution-dyed acrylic?

Most yarns are created by spinning a fiber into a white yarn. Color is added to the yarn's surface when it is dipped in a dye bath.

*Think radish*

Solution-dyed acrylic polymers are blended with pigments and extruded into a color fiber. The colored fiber is then spun into a yarn that can be woven.

*Think carrot*

## What makes ours special?

### Fadeproof

- Our solution-dyed acrylic has the highest fade resistance in the industry.
- Villa & Villa Textures meets 2600 light hours.
- Light hours are determined under specific lab conditions.
- Fabric is suitable for use in extreme humid or arid climates without degradation or loss of strength.

### Bleach Cleanable

- Fiber is inherently mold and mildew resistant.
- Treated with water repellent, stain resistant finish.
- Fabric can be cleaned with soap and water, solvents and even bleach.
- Bleach cleanability matters—it is the only cleaning agent that removes mildew.
- Machine washable; cold water delicate, air dry.

### Tested

- Fabrics meet US standards for flame resistance on upholstery.
- Most patterns meet or exceed 15,000 double rubs.
- All patterns meet or exceed standards for pilling.

### Guaranteed

Our 5-year limited warranty guarantees our fabric for use in normal conditions including sunlight, salt and weather exposure.

Coverage includes:

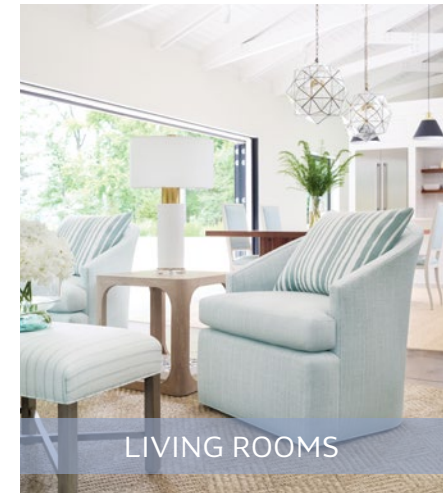

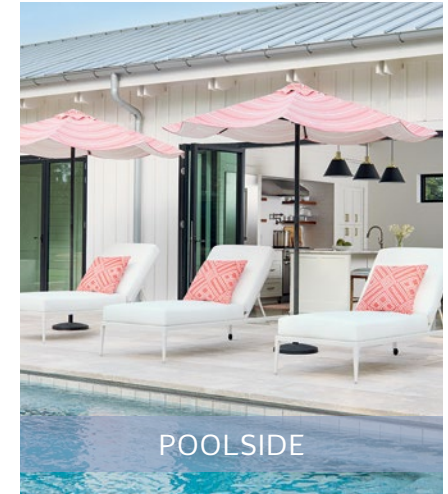

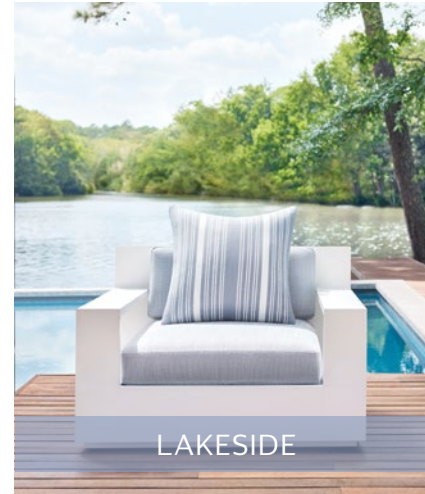

- Significant loss of color
- Degradation / loss of strength
- Abrasion

It does not cover misuse or abuse, dye transfer from clothing onto fabric, or pilling.

NOTE: *Any fuzz caused by the shorter fiber inherent to solution-dyed acrylic may be removed with a sweater shaver.*
