Material is shipped untrimmed.

MAINTENANCE:

In most cases cleaning of the murals can be done by simply wiping down the mural with a soft, clean, dry cloth. In some instances your mural may need a bit more care.

Use a soft, clean, sponge with warm water and mild liquid dish soap, you can gently wipe at the surface of the mural. Be sure to clean from the bottom upward so you do not leave streaks. Go slow and gentle to lift any dirt.

After cleaning the mural rinse with a sponge dampened in clean water. Pat dry with a towel.

The material is digitally printed, do not scrub the surface as it can damage the printed surface. Absolutely no chemical or abrasive cleaners can be used on the mural.

If you need a bit more protection a liquid laminate can be applied to the surface of the mural. Please contact us for ordering information and details on how to apply the laminate.

Do not use a protective coating or laminate without first checking with us - some laminates can completely remove the ink, we will order the correct one for you.
